TO: Service List/ PSB Docket No. 7032 and Affected Municipalities

RE: PSB Docket No. 7032 – Lamoille County Project  
Line Design

Ladies and Gentlemen:

On July 14, 2006, Vermont Transco, LLC, Green Mountain Power Corporation and the Town of Stowe Electric Department (the "Petitioners") provided design plans relating to the proposed line construction from Duxbury to Stowe, Vermont and promised an update to reflect five changes or additions. We notified you on July 26, 2004 that there had been a delay in receiving those updated plans, and they are now enclosed for your review.

The following documents are included herewith:

- Preliminary Line Design Plan and Profile Drawings
  - Aerial View
  - Land View
- Typical Structure Types (updated)

NOTE: If you are receiving a copy of this filing because you are an affected municipality, please be aware that affected landowners along this route may wish to view the plans at your Town offices.

Petitioners have now met with the Agency of Natural Resources, Forest, Parks and Recreation Department, and an agreed upon slight alteration of the proposed crossing at the Waterbury Reservoir is reflected in the new Plan and Profile drawings enclosed.

Changes in the Stowe substation 34.5 kV bus and line exits are reflected in the new Plan and Profile drawings enclosed.

The enclosed Plan and Profile drawings now show where guy wires will be used and a revised "Typical Structure Types" is also enclosed. Note that steel davit arms are being proposed instead of wood, due to strength requirements.

There are still two areas with requests for a change pending. At Blush Hill, pole #37, the affected landowners have been away but a meeting is scheduled. A Shaw Hill landowner request to not exceed 814' in total elevation for both the 115 kV and 34.5 kV circuit poles

has proven to be very difficult for one 34.5 kV pole due to the terrain challenges, and options are being explored. Vermont Transco is working with a Shaw Hill resident's consulting engineer on meeting the 814' total elevation request, but there is no change contemplated at this time. If either of these changes is determined to be feasible, we will notify you in the future.

It is our hope that you will complete your review of these plans prior to but no later than August 15, 2006, so that we can evaluate and incorporate any comments received, make the necessary changes and submit final Design plans to the PSB on or before August 25, 2006 as shown on the Project schedule.

Your comments on the enclosed should be directed to David P. Haas, Vermont Transco, LLC, 366 Pinnacle Ridge Road, Rutland, VT 05701, telephone 802-770-6215.

Thank you in advance for your cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read "William B. Piper". The signature is fluid and cursive, with the first name being the most prominent.

William B. Piper
