TO: Service List/ PSB Docket No. 7032 and Affected Municipalities

RE: PSB Docket No. 7032 – Lamoille County Project  
Line Design

Ladies and Gentlemen:

On March 16, 2006, the Vermont Public Service Board ("Board" or "PSB") issued an Order and Certificate of Public Good ("CPG") approving the Lamoille County 115 kV Project (the "Project") as proposed by Vermont Transco, LLC, Green Mountain Power Corporation and the Town of Stowe Electric Department (the "Petitioners"). Page 73 of the Order requires the Petitioners to provide design plans to the "affected parties" one month prior to filing the final design plans with the Board. This attached set of design plans relates to the proposed line construction from Duxbury to Stowe, Vermont and includes the changes and/or reroutes that were provided to the parties on June 30, 2006.

The following documents are included herewith:

- Preliminary Line Design Plan and Profile Drawings
  - Aerial View
  - Land View
- Line Design Criteria
- Typical Structure Types
- Proposed Aesthetic Mitigation Plan
- Environmental Assessment for Changes from Original Design

NOTE: If you are receiving a copy of this filing because you are an affected municipality, please be aware that the Petitioners are sending a letter to affected landowners along this route notifying them that we are providing you with a copy of the plans. They have the option of viewing the plans at your Town offices, on our website at [www.velco.com](http://www.velco.com), or requesting a copy for themselves.

The enclosed plan represents a thorough post-CPG public outreach, including group landowner meetings, individual site visits and meetings with state agencies. The plans represent a work-in-progress, as the Petitioners are still diligently working with landowners and other parties to ensure that the plans represent the best possible solution to this much needed reliability upgrade. Petitioners will update the plans in two weeks to reflect the following five (5) changes or additions:

1. Petitioners met this week with Forest & Parks and have an agreed upon route change at the Waterbury Reservoir;
2. There has been a request for a change at Blush Hill, pole #37, which the Petitioners are considering but they need to contact all affected landowners;
3. Stowe substation 34.5 kV bus and line exiting changes per requests from Cady Hill landowners;
4. A Shaw Hill landowner request to not exceed 814' in pole height total elevation for both the 115 kV and 34.5 kV circuits has proven to be very difficult for one 34.5 kV pole due to the terrain challenges, and options are being explored;
5. The enclosed Plan and Profile drawings do not show where guy wires will be used and do not identify all structure types, and the Petitioners would like to provide that information in a updated filing.

It is our hope that you will complete your review of these plans prior to but no later than August 15, 2006, so that we can evaluate and incorporate any comments received, make the necessary changes and submit final Design plans to the PSB on or before August 25, 2006 as shown on the Project schedule.

Your comments on the enclosed should be directed to David P. Haas, Vermont Transco, LLC, 366 Pinnacle Ridge Road, Rutland, VT 05701, telephone 802-770-6215.

Thank you in advance for your cooperation.

Sincerely,

William B. Piper
