RE: PSB Docket No. 6860 – Northwest Vermont Reliability Project  
Blissville Substation Submittals

Dear Mrs. Hudson:

In accordance with the Public Service Board (“PSB” or “Board”) final Order in PSB Docket No. 6860, Vermont Electric Power Company, Inc. (“VELCO”) provided the Blissville substation plans to the affected parties for pre-review on February 3, 2006. The enclosed final plans are now being filed with the Board for approval following a two week comment period.

Enclosed please find six copies of the following documents:

- General Arrangement - drawing 229-6000D
- General Arrangement Elevations A, B, C, D & E - drawing 229-6020D
- General Arrangement Elevations F, G, H & J - drawing 229-6021D
- One Line Diagram – drawing 229-OL-0001F

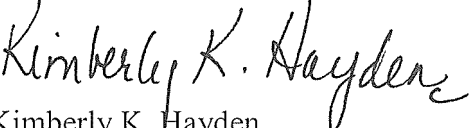

A tree clearing plan is not included with this submittal since the expansion area at this substation is mostly scrub-shrub, and will not involve extensive logging.

Comments on the preliminary plans were received from the Department of Public Service. VELCO’s proposed changes from its original submittal include a revised fence line footprint on General Arrangement drawing 229-6000D, and minor re-labeling edits on the One Line Diagram, drawing 229-OL-0001F.

We will provide this letter and attachments in electronic format (on a CD) to any party requesting it. VELCO will also post these files on its website at [www.velco.com](http://www.velco.com).

Thank you for your attention to this matter. Please contact me if you have any questions or comments about this filing.

Sincerely,

  
Kimberly K. Hayden
