

Strategic Solution Option Effectiveness Summary (In Order of the CWG's Preference)

Option	Southern VT root problem →	#1 - Existing Southern Loop contingency reliability exposure	#2 - Existing Brattleboro contingency reliability exposure	#3 Existing T4 long-term outage exposure	#4 Future load growth in southern Vermont	#5 future regional reliability problems	combined effectiveness score (on a scale of 10)
7	A,B,S,DSM (19 Mw) / DG (21 Mw)	●	●	●	●	●	10
4	A,B,C,D,S	●	●	●	●	●	10
2	A,B,C,S	●	●	●	●	●	10
9	S,DSM (26 Mw) / DG (38 Mw)	●	●	○	●	○	6

Legend → ● = very effective ◐ = somewhat effective ○ = ineffective

Note: The "combined effectiveness score" for each solution option is determined by assigning 2 points for a full circle, 1 point for a half circle, and zero points for an empty circle, in each problem category.
